Software & Systems Process Engineering Meta-Model (SPEM 2.0) OMG Draft Adopted Specification ad/2006-06-02	Internal Version: 1.5
SPEM 2.0 RFP ad/2004-11-04: 3rd Revised Submission	Date: June 2006

## Table of Contents

Soft	ware & Systems Process Engineering Meta-Model (SPEM 2.0)	1
OM	G Draft Adopted Specification ad/2006-06-02	1
1	Scope	10
2	Conformance	10
3	Normative References	10
4	Terms and Definitions	10
5	Symbols	10
6	Additional Information	11
	6.1 Background and Rationale 6.2 Key New Capabilities of SPEM 2.0 6.3 Class constraint of method content definitions from the development process application of	11 11
	<ul> <li>6.2.1 Clear separation of method content definitions from the development process application of method content</li> <li>6.2.2 Consistent maintenance of many alternative development processes</li> <li>6.2.3 Many different lifecycle models</li> </ul>	11 14 15
	<ul><li>6.2.4 Flexible process variability and extensibility plug-in mechanism</li><li>6.2.5 Multiple 'views' of Process content</li></ul>	16 17
	6.2.6 Reusable process patterns of best practices for rapid process assembly 6.2.7 Replaceable and reusable Process Components realizing the principles of encapsulation	18 18
	<ul> <li>6.3 Specification Formalism</li> <li>6.4 Changes to Adopted OMG Specifications</li> <li>6.5 How to Read this Specification</li> <li>6.6 Acknowledgements</li> </ul>	19 22 22 23
7	Design Principles and Packaging of the SPEM 2.0 Meta-Model	24
,	<ul> <li>7.1 SPEM 2.0 Meta-Model Architecture Overview</li> <li>7.2 Additional SPEM 2.0 Implementation Scenarios</li> <li>7.3 Using SPEM 2.0 as a UML 2.0 Superstructure Profile</li> <li>7.3.1 SPEM 2.0 Profile Overview</li> <li>7.3.2 Describing Work Definitions and Work Breakdown as UML Behavior Models</li> <li>7.3.3 Describing Work Product evolution with State Machines</li> <li>7.3.4 Relating Work Product State to Work Definitions</li> </ul>	24 27 27 27 27 29 33 34
8	Process Structure	36
	<ul> <li>8.1 Process Element</li> <li>8.2 Breakdown Element</li> <li>8.3 Breakdown Element Kind</li> <li>8.4 Work Breakdown Element</li> <li>8.5 Work Sequence</li> </ul>	37 38 39 39 40
	8.6 Work Sequence Type 8.7 Work Definition	40 40 41
